**mpa**  
Mineral Products Association  
The Trade Association for the Aggregates, Asphalt,  
Cement, Concrete, Dimensional Stone, Lime, M & M  
and Silica Sand Industries

## MPA Good Neighbour Scheme

<b>Public Safety</b> Protect the general public around active operations, on disused sites and in the transportation and use of products.	<b>Site Roads</b> Maintain clean and well drained site roads, kept free from mud and dust, signposted with appropriate speed limits.	<b>Dust</b> Ensure that dust emissions are managed within the site to prevent fugitive dust impacting neighbours.
<b>External Appearance</b> Site perimeter is clear, fenced, walled or protected effectively, and maintained. Ensure site is well restored or left in good condition.	<b>Plant and Stocking Areas</b> Ensure that the processing plant and stocking areas are tidy, well drained and visual impacts mitigated.	<b>Water</b> Minimise the abstraction and discharge of water and suspended solids and manage drainage flows across the site effectively.
<b>Site Entrance Signage</b> Install an entrance sign detailing the name of the company, the site manager or main company contact and relevant contact details.	<b>Traffic</b> Ensure traffic to and from the site is sheeted, speed limits observed, and minimise hazards and risk to other road users and pedestrians.	<b>Complaints</b> Ensure all complaints are recorded, and justifiable complaints are actioned, monitored and tracked.
<b>Site Entrance</b> Ensure that the entrance to the site and its environs are clean, tidy and well maintained, well signposted and kept free of mud and dust.	<b>Noise and Vibration</b> Select, maintain and locate plant and machinery so that effects of noise and vibration on the environment and local community are minimised.	<b>Office Facilities</b> Maintain in good repair/clean condition, clearly marked/safely located parking areas, site records and documents are up to date.
		<b>Community Engagement</b> Consider the need for a community engagement plan
